Technical Skills

Data Analytics & BI: Power BI (DAX, Data Modeling, PBIX Optimization, Performance Tuning), SQL, Data Warehousing, ETL, Data Pipeline Automation, Tableau (Data Analysis, Data Modeling, Data Visualization Tools, Spreadsheet Skills)

Programming & Scripting: Python, Golang

Web Frameworks: Flask, Spring Boot, React.js, REST APIs

AI & Developer Tools: Claude, Cursor AI, Docker, Postman, GitHub Copilot, VS Code, Jupyter Notebook, Excel, PowerPoint, Git

AI & Automation: Prompt Engineering, AI-assisted Development, NLP Applications, Workflow Automation, LLM Integration

Methodologies: Agile & Scrum, SDLC, Data Governance

Experience

[certificate](#)

Rooman Technologies

September 2024 – March 2025

Cloud Application Developer Intern

Bengaluru, India

- Developed a cloud-based **backup & recovery system** using IBM Cloud Object Storage.
- Automated backup scheduling with Python scripts, reducing manual effort by **80%**
- Enhanced data retrieval speed by **25%** using indexed storage and validation checks.

Colt Assits

October 2023 – November 2023

Web Development Intern

Bengaluru, India

- Developed full-stack features with **Java, Spring Boot, REST APIs, Thymeleaf**.
- Fixed **15+ UI/UX issues**, boosting front-end performance by **20%**
- Collaborated in Agile sprints, handling deployments via Git.

Personal Projects

Power BI Sales Dashboard | Power BI, Excel

- Designed an interactive sales dashboard to analyze **orders, customers, and supervisor performance**.
- **Features:** Sales & cost analysis, customer/product insights, supervisor tracking, state-wise distribution.
- Tools: Microsoft Excel (data source), Power BI (dashboard creation & visualization).

AI Video Dubbing System | Python, Flask, Wav2Lip, Deep Learning

- Developed a multilingual dubbing platform with **lip-sync accuracy** using Wav2Lip & TTS.
- Automated video upload and dubbing pipeline → reduced manual editing effort by **70%**.
- Enabled scalable dubbing for short videos, improving **processing efficiency**.

AI-Driven NLP to SQL Query & Visualization | Python, Flask, OpenAI API, SQL, Chart.js

- Converted natural language queries into SQL using LLMs.
- Integrated interactive chart visualizations for **non-technical users**.
- Reduced data query effort by **eliminating SQL knowledge dependency**, boosting accessibility.

Education

Bachelor of Engineering in Computer Science, HKBK College of Engineering (VTU), 2021–2025

CGPA: 7.24
